

We are Oklahoma County's Child Advocacy Center.

OUR MISSION

is to prevent child abuse and provide opportunities for healing and hope for children in Oklahoma County.

OUR VISION

is to end child abuse in Oklahoma County.

2020 TOTAL IMPACT

15,036 INDIVIDUALS SERVED

PREVENTION EDUCATION

The CARE Center offers free prevention education training and resources for the community.

FOR ADULTS

Recognizing & Reporting Child Abuse & Neglect gives adults the tools they need to identify, report, and prevent child abuse.

FOR CHILDREN

ROAR teaches children ages 4-8 how to protect themselves from abuse. A cartoon lion named Rex teaches children how to find their ROAR using his "Rules of ROARing":

- R**emember, privates are private.
- O**kay to say no.
- A**lways talk about secrets.
- R**aise your voice and tell someone.

11,176 CHILDREN
957 ADULTS EDUCATED

PROGRESS

In 2020, we started construction on a brand new, nearly 7,000 square foot facility. Here's some of the progress we've made with this expansion:

- More community collaboration!
- Now on our campus: OU's Problematic Sexual Behavior - Cognitive Behavioral Therapy program, OKCPD's Crimes Against Children Unit, and OKDHS' CARE Unit, state nurses, and a respite facility for children awaiting placement.
- More forensic interviewing rooms! This means shorter wait times for children and families.
- Expanded client-serving areas! We now have a state-of-the-art waiting room and playroom facilities with diverse and inclusive play options.
- Large conference spaces for community trainings, meetings, and events.

VICTIM SERVICES

Upon a substantiated allegation by DHS or law enforcement, children are brought to The CARE Center to receive the healing and investigative services below in our safe, child-focused environment at no cost to families:

FORENSIC INTERVIEWS

We conduct nonleading, child-friendly forensic interviews for the purpose of gathering information for use in investigation. The audio- and video-recorded interviews reduce the number of times a child must share their abuse story and therefore reduces further trauma to the child.

FAMILY ADVOCACY

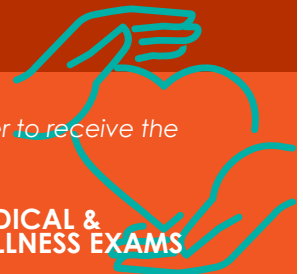

Our family advocates meet one-on-one with non-offending caregivers during the child's forensic interview. This is an opportunity for caregivers to ask questions, receive resources, and discuss the family's needs. Advocates connect families with resources that remove barriers to healing.

TRAUMA-INFORMED MENTAL HEALTH

Mental health intervention is a critical step for children who experience trauma. To meet this need, we offer on-site or virtual counseling, crisis intervention services, observational assessments, mental health education, and referrals to off-site, long-term counseling through partner agencies.

MEDICAL & WELLNESS EXAMS

We provide medical and wellness exams for children. These exams serve to evaluate and treat any medical conditions as a result of abuse and/or neglect, ensure the well-being of the child, and collect evidence for the abuse investigation.

1,469 CHILDREN **1,434 ADULTS** SERVED
